

Sales Report

Vision

Our vision is to become a market-leading organisation recognised for excellence in performance, innovation, and customer service. We envision a future where strategic insights, advanced analytics, and responsible decision-making drive consistent profitability, operational effectiveness, and long-term success.

Mission

Our mission is to deliver high-quality products supported by data-driven strategies that maximise customer satisfaction and business performance. We aim to operate efficiently, maintain competitive pricing, and continuously improve our processes to ensure sustainable growth and value creation for all stakeholders.

Introduction

Our mission is to deliver high-quality products supported by data-driven strategies that maximise customer satisfaction and business performance. We aim to operate efficiently, maintain competitive pricing, and continuously improve our processes to ensure sustainable growth and value creation for all stakeholders.

Exclusive Summary

This report provides an overview of sales, cost of sales, quantity sold, price changes, and gross profit trends across different months and years. The visuals indicate strong seasonal patterns, steady growth in sales volume, and cost pressures that affect overall profitability. The insights are based on pivot tables, charts, and KPIs generated in Excel.

Monthly trends

Sales peaked between April and July, with May showing the highest performance. Lowest sales occurred in January and December, indicating off-peak demand. Cost of sales closely follows sales trends, increasing during high-sales months.

Yearly performance

QUNTITY SOLD BY YEAR

% GROSS PROFIT PER YEAR

2015 and 2016 contributed the most to total sales, together accounting for the largest sales share. Quantity sold increased significantly from 2013 to 2016, showing a strong upward trend. Gross profit is negative overall, suggesting pricing, cost structure, or discount issues.

sales and change in price

Sales by Cost of sale

% CHANGE IN PRICE PER YEAR

Costs absorbed a high percentage of sales in all years. 2016 shows the largest cost-of-sales value, reflecting expansion but also decreasing profitability margins. Price change percentages vary in highest price increase occurred in 2014. More moderate changes were recorded in other year. These changes correlate with shifts in sales and profitability.

R186 909 828 ***Total sales***

R134 026 109 ***Cost of sales***

R5 279 872 ***Quntity sold***

R-92135 ***Gross profit***

KPIs Overview

Although the business is achieving high sales and strong demand, the high cost structure and extremely elastic prices are pulling gross profit into negative territory. This indicates that current pricing may be too low relative to costs. Strategic adjustments in pricing, cost control, and product profitability are needed to restore positive margins.

Recommendations

1. Review pricing strategy
 - Current pricing may be too low relative to cost.
2. Reduce cost of sales
 - Negotiate supplier discounts or improve operational efficiency.
3. Analyse high-season performance
 - Capitalise on months like May and June with promotions and stock readiness.
 - Consider premium pricing, bundling, or cost optimisation.
4. Investigate low months
 - Identify reasons for low sales in January and December.

Conclusion

The data reveals strong sales growth and increasing demand over the years, but profitability is severely affected by rising costs and weak margins. To improve financial performance, the business must reassess pricing strategies, strengthen cost controls, and take advantage of seasonal trends. Strengthening these areas will help turn high sales volumes into sustainable profitability.
